## PROFILE

---

(FE heavy) Fullstack (MERN) web developer with bachelor of science and overall 4 years of experience.

Proven expertise in building websites and backend with modern JavaScript frameworks and databases.

## EDUCATION

---

**Tabor College**, *Bachelor's in Science*

Jan 2018 - May 2020

**Butte College**, *Associate's in Science*

May 2016 - Dec 2018

## EXPERIENCE

---

**Freelance Developer**, La Jefa Mexicana (McPherson, KS.)

Nov. 2022 - Current

- Developed and maintained full-stack web application using the MERN (MongoDB, Express.js, React, and Node.js) stack.
- Designed and implemented RESTful APIs using Node.js and Express.js for server-side functionality.
- Built interactive and responsive front-end user interfaces using React.js, Redux, and Tailwind CSS.
- Created and maintained MongoDB databases to store and manage data for web applications.
- Implemented user authentication and authorization using JWT and Passport.js.
- Optimized web applications for performance and scalability, using techniques such as code splitting, lazy loading, and caching.

- Used Git and GitHub for version control and collaborative development.
- Kept up-to-date with the latest trends and best practices in web development, including new MERN stack technologies and tools.

**Freelance Developer**, TTF LLC. (McPherson, KS.)

Dec. 2021 - Nov. 2022

- Developed and maintained full-stack web applications using the MERN (MongoDB, Express.js, React, and Node.js) stack.
- Designed and implemented RESTful APIs using Node.js and Express.js for server-side functionality.
- Built interactive and responsive front-end user interfaces using React.js, Redux, and Bootstrap.
- Maintained MongoDB databases to store and manage data for web applications.
- Optimized web applications for performance and scalability, using techniques such as code splitting, lazy loading, and caching.
- Used Git and GitHub for version control and collaborative development.
- Kept up-to-date with the latest trends and best practices in web development, including new MERN stack technologies and tools.

**Freelance Developer**, Juwan Holts (Artist) (Houston, TX.)

May 2020 - Mar. 2021

- Developed and maintained full-stack web application using the MERN (MongoDB, Express.js, React, and Node.js) stack.
- Implemented RESTful APIs using Node.js and Express.js for server-side functionality.
- Built interactive and responsive front-end user interfaces using React.js, Redux, and Bootstrap.
- Maintained MongoDB databases to store and manage data for web applications.
- Used Git and GitHub for version control and collaborative development.
- Kept up-to-date with the latest trends and best practices in web development, including new MERN stack technologies and tools.

- 

**Frontend Contract Developer**, Doxie Designs (McPherson, KS.) Dec. 2019 - May 2020

- Developed and maintained responsive and user-friendly websites using HTML, CSS, and JavaScript.
- Utilized modern front-end frameworks such as React, Vue, or Angular to build scalable and modular web applications.
- Built and optimized web pages for cross-browser compatibility and fast page load times.
- Created and integrated RESTful APIs with front-end code to fetch and display data from servers.
- Implemented web accessibility best practices and ensured compliance with WCAG standards.

- Stayed up-to-date with the latest front-end technologies, trends, and best practices.

## SKILLS

---

- Vanilla JavaScript
- React, Redux, Context Api, Hooks
- Node
- MySQL, PostgreSQL, MongoDB
- RESTful API, GraphQL
- Agile, Scrum
- Express
